LOCATION MAP

Who We Are

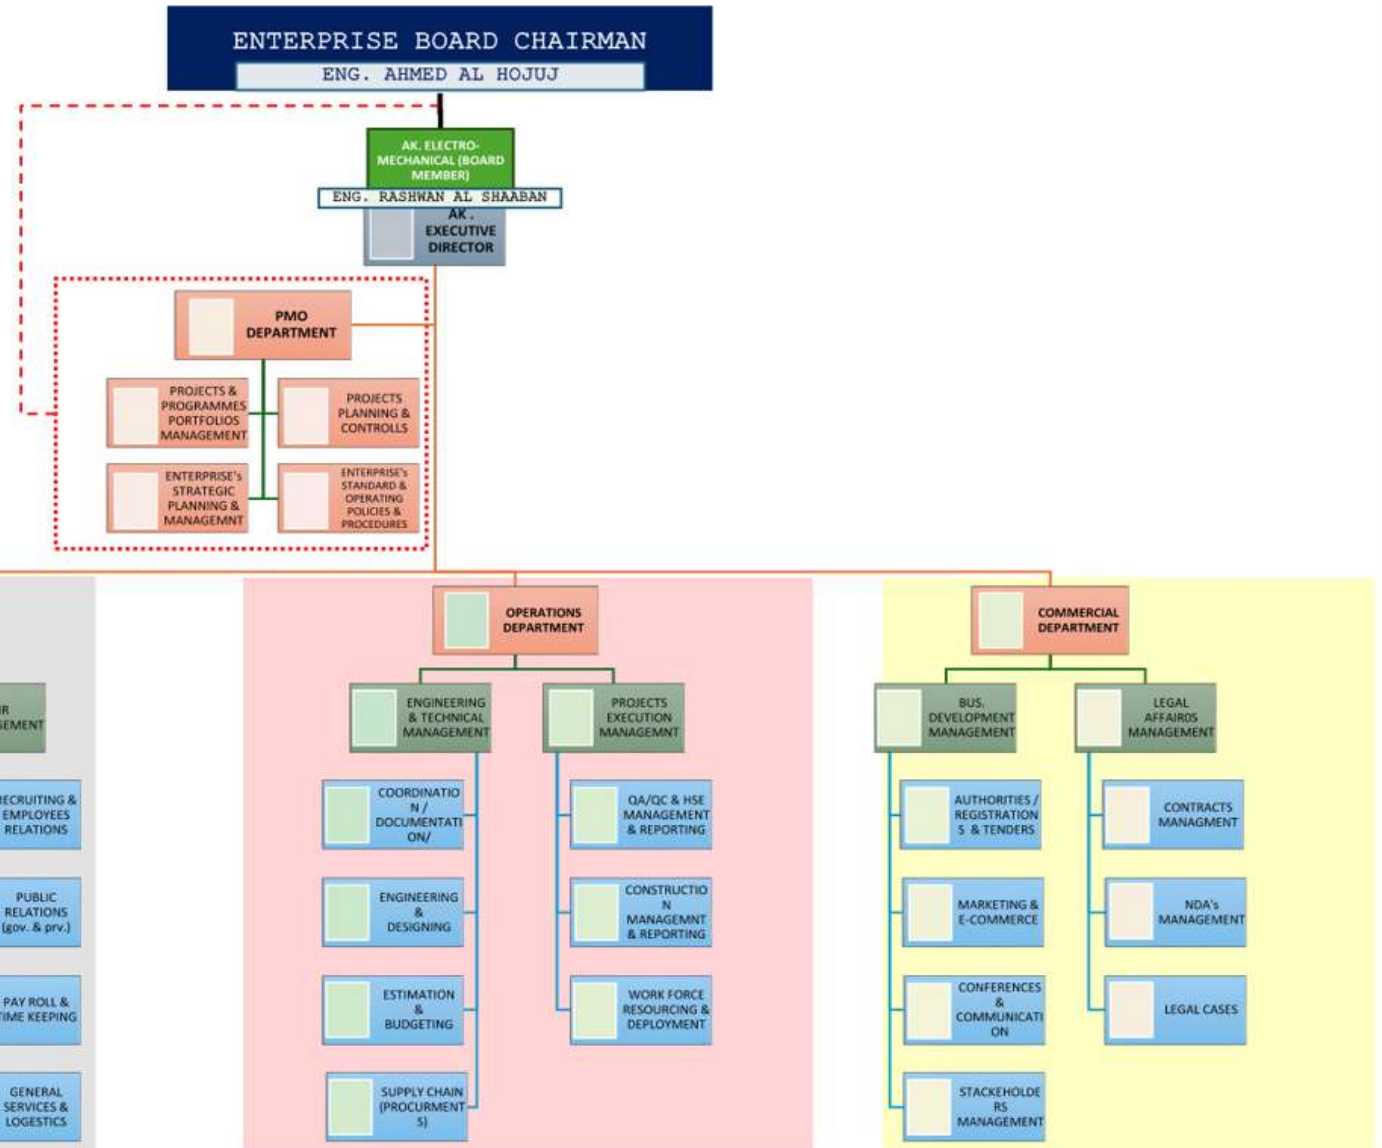

Al HOJUH-Contracting Company is a privately owned company operating under the laws of the U.A.E., specializing in the supply and erection of Glass-Fused-to-Steel bolted storage tanks. With a strong presence in the U.A.E. and the GCC countries, we are now expanding into the wider Middle East and North African regions. In addition to Glass-Fused-to-Steel bolted storage tanks, HOJUH-Contracting is one of the Gulf's leading suppliers and erectors of Glass coated steel bolted tanks, as well as welded steel silos for the storage and processing of liquid and dry products in agriculture, municipal, and industrial applications. Accredited to ISO 9001, HOJUH is committed to providing the highest quality tank erections. As a technical leader and established global brand within the modular bolted containment and storage industry, HOJUH-Contracting offers expertise and support for applications or industries heavily reliant on water, providing solutions for containment, storage, treatment, or preservation needs.

ORGANIZATION CHART

This is a preliminary perspective of the functional departments, sections, & divisions that enable the company to start steady steps towards the application of comprehensive management - which is governed by a strong organizational structure and leads to the realization of the vision and mission of the company.

Therefore, we can consider this perspective as a road map, which should be the basis for the main development goals of the strategic plan, and by exploiting and using all kinds of resources in the best way.

GLASS FUSED TO STEEL BOLTED TANKS

Glass-Fused-To-Steel Bolted Tanks are versatile and durable solutions for various storage needs. They are commonly used for Potable Water Tanks, ensuring safe and clean water storage for communities. In agricultural settings, these tanks serve as reliable Irrigation Water Tanks, providing a consistent water supply for crops. For industrial purposes, they are ideal as Dry Storage Tanks, offering secure storage for materials and goods. Additionally, Glass-Fused-To-Steel Bolted Tanks are well-suited for use as Sewage Tanks, providing efficient containment and treatment of sewage. Their robust construction and corrosion-resistant properties make them a preferred choice for a wide range of applications.

Option 1 – Grade of Coating

- APPLICATION: PH 3-9
- TYPE: 2 COAT, 1 FIRE
- THICKNESS: 200-360 MICRONS
- TEST REGIME: ZERO DISCONTINUITIES AT 700V
- EXCEEDS QUALITY REQUIREMENTS OF EEA 7.20
- MEETS OR EXCEEDS THE GLASS COATING REQUIREMENTS OF AWWA D103-09 – SECTION 12.4
- MEETS OR EXCEEDS QUALITY REQUIREMENTS AWWA D103-9

Option 2 –Grade of Coating

- APPLICATION: PH 2-11
- TYPE: 3 COAT, 2 FIRE
- THICKNESS: 280-460 MICRONS
- TEST REGIME: ZERO DISCONTINUITIES AT 1100V
- EXCEEDS QUALITY REQUIREMENTS OF EEA 7.20
- MEETS OR EXCEEDS THE GLASS COATING REQUIREMENTS OF AWWA D103-09 – SECTION 12.4

Option 3 – Grade of Coating

- APPLICATION: PH 1-14
- TYPE: 3 COAT, 2 FIRE
- THICKNESS: 340-500 MICRONS
- TEST REGIME: ZERO DISCONTINUITIES AT 1500V
- EXCEEDS QUALITY REQUIREMENTS OF EEA 7.2

SCOPE OF WORKS

SCOPE OF WORKS

CONCRETE WATER TANKS

Concrete water tanks are a reliable and durable solution for storing water in various settings. These tanks are often used for residential, commercial, and industrial purposes, providing a secure and long-lasting storage option. Concrete tanks can be customized to suit specific needs, including size, shape, and capacity, making them versatile for different applications. They are particularly popular for storing water for irrigation, firefighting, and emergency purposes. With proper maintenance, concrete water tanks can last for decades, making them a cost-effective and sustainable choice for water storage.

Our work encompasses a range of essential components for efficient water management systems. This includes the implementation of a comprehensive waterproofing system to ensure the integrity and longevity of structures. We also specialize in designing pump rooms, carefully considering dimensions to accommodate equipment and facilitate optimal functionality. Additionally, our expertise extends to the provision of pump stations, tailored to meet specific project requirements in terms of capacity and performance. We are adept at integrating Variable Frequency Drive (VFD) control panels and Programmable Logic Controllers (PLC) into our systems, enhancing operational efficiency and control.
